JOFRA AMC910 Advanced Multi-purpose Calibrator

The AMC910 multi-purpose calibrator is the right solution for high precision signal, temperature, and pressure calibrations, as it combines the power and features of a laboratory calibrator, with the addition of an isolated measurement channel. The feature with sourcing and measuring in one instrument gives extended flexibility and use needed for testing instruments as well as for field calibrations.

- Accuracy to $\pm 0.003\%$ of reading $\pm 0.001\%$ F. S.
- Output: 0-100 mA, 0-100 VDC, -10-100 mV, TCs (13 types), RTDs (9 types), 5-4000 Ω
- Input: -10-75 mV, TCs (13 types), RTDs (10 types), 5-4000 Ω
- Isolated input: 0-100 VDC, 0-50 mA
- External JOFRA APM pressure module capability
- JOFRA STS temperature reference sensor capability
- RS232, IEEE-488 or optional USB interface cable

Find more information in specification sheet SS-CP-2385 at www.jofra.com

JOFRA CSC200 Compact Signal Calibrator

The JOFRA CSC200 signal calibrator is designed to make calibration and maintenance tasks easier to perform. The CSC200 is engineered for the calibration of temperature instruments offering the ability to measure and simulate several different types of RTDs and TCs. This instrument makes the job easy by utilizing a thermocouple plug for easy connection and it works with 2, 3, or 4-wire RTDs.

- Accuracy to $\pm 0.2^\circ\text{C}$ / 0.36°F
- TC and RTD input/output
- Reads and simulates temperature
- Fuseless protection on all inputs
- Part of a complete marine program
- Use the CSC200 in conjunction with JOFRA dry-block calibrators
- Use the CSC200 to read a JOFRA reference probe to ensure that the test points have the correct temperature

Find more information in specification sheet SS-CP-2332 at www.jofra.com

JOFRA CSC100 Compact Signal Calibrator

The JOFRA CSC100 signal calibrator offers the features needed for specific calibration, testing, and troubleshooting tasks. The CSC100 is engineered for instrument loop calibrations and is specifically manufactured for 4 to 20 mA loops. This calibrator can source and read current and voltage, including millivolts. It can also be used as a signal simulator to test transmitters without the need for actual operation.

- Accuracy to $\pm 0.015\%$ of reading
- mA and voltage input/output
- Sources and reads loop voltage and current
- Fuseless protection on all inputs
- Easy-to-read, two line display, and an intuitive keypad with a knob for fine adjustments
- Part of a complete marine program

Find more information in specification sheet SS-CP-2330 at www.jofra.com

JOFRA mAcal Calibrator

The JOFRA mAcal calibrator is the economical answer to easy and accurate loop calibration. Test all 4-20 mA loops in the process with this handy calibrator that sources, reads, steps through test points, converts readings to percentages, and more.

- Accuracy to $\pm 0.05\%$ F. S.
- Auto-stepping and ramping
- 24 VDC loop power
- Measures to ± 45 VDC and 24 mA
- Flow reading function
- Reads in mA, %, VDC, or sec
- Part of a complete marine program

Find more information in specification sheet SS-CP-2320 at www.jofra.com

JOFRA ASM Advanced Signal Multi-scanner

The JOFRA ASM signal multi-scanner adds further flexibility and time-saving features to the calibration routines, as the ASM multi-scanner is delivered in 3 versions, enabling calibration of different kinds of sensors and calibration of up to 8 temperature sensors with one multi-scanner.

ASM-801 has 8 universal plugs. This is a fixed screw terminal solution for measuring RTD's, TC's, power, voltage, ohm, and transmitters.

ASM-802 has 8 small TC plugs for measurement of TC sensors.

ASM-803 has 8 LEMO plugs, which are primarily for measurement of RTD sensors. This solution of plugs also enables you to measure current, voltage and ohm.

The ASM is delivered in two different models: The ASM A model uses the measuring circuit of a connected measuring instrument such as an ASC300 or an ATC temperature dry-block B model. The ASM B model does not have to use the measuring instrument in the set-up, as the multi-scanner is able to perform the measurements itself. The most important advantage of the B model is its ability to perform several measurements each second.

Connecting three ASM multi-scanners makes it possible to perform automatic calibrations of up to 24 sensors at the same time using JOFRACAL calibration software.

- Accuracy to $\pm 0.026^{\circ}\text{C}$ / 0.047°F
- 6 different models
- Input: TCs (12 types), RTDs (13 types), 0-12 VDC, 0-24 mA, 0-4000V
- 24 V supply for transmitters
- 100% automatic calibration of up to 24 sensors
- JOFRA STS temperature reference sensor capability
- RS232 interface and JOFRACAL calibration software

Find more information in specification sheet SS-CP-2360 at www.jofra.com

JOFRA ASC300 Advanced Signal Calibrator

The JOFRA ASC300 covers all needs for a process signal calibrator with superior accuracy and compact enough to fit into the tool box. The ASC300 measures and sources: TCs, RTDs, current, voltage, frequency, and pulse trains. This instrument is also designed to be compatible with the JOFRA APM pressure modules, thus offering true multi-function operability.

- Accuracy to $\pm 0.2^{\circ}\text{C}$ / 0.36°F
- Simultaneous input and output
- Input and output: TCs (13 types), RTDs (14 types), 0-20 VDC, 0-24 mA, 5-4000 V, 0-10 kHz, and pulse trains
- Isolated read-back circuit with 24 VDC loop power
- Fuseless protection on all inputs
- External JOFRA APM pressure module capability
- Part of a complete marine program
- RS232 interface and JOFRACAL calibration software

Find more information in specification sheet SS-CP-2350 at www.jofra.com

JOFRA APM Advanced Pressure Module

The JOFRA APM pressure modules extend the usage of the JOFRA APC pressure calibrator as well as the ASC300 and AMC910 multi-function signal calibrators. The modules are available in a series of accuracies, ranges, units, and pressure references from vacuum to absolute pressure. All APM modules contain the calibration data. Just connect the modules to the instrument and perform the measurement.

- Accuracy to $\pm 0.01\%$ F. S.
- Pressure range vacuum to 700 bar / 10,000 psi
- 62 different models
- Rugged and dependable for field or lab use
- Gauge, absolute, vacuum, differential, and combination modules
- Supplied with fittings for NPT and BSP threads

AMETEK Calibration Instruments
is one of the world's leading manufacturers and developers of calibration instruments for temperature, pressure and process signals as well as for temperature sensors both from a commercial and a technological point of view.

JOFRA Temperature Instruments
Portable precision thermometers, Dry-block and liquid bath calibrators: 4 series, with more than 25 models and temperature ranges from -90° to 1205°C / -130° to 2200°F. All featuring speed, portability, accuracy and advanced documenting functions with JOFRACAL calibration software.

JOFRA Pressure Instruments
Convenient electronic systems ranging from -1 to 1000 bar (25 inHg to 14,500 psi) - multiple choices of pressure ranges, pumps and accuracies, fully temperature-compensated for problem-free and accurate field use.

JOFRA Signal Instruments
Process signal measurement and simulation for easy control loop calibration and measurement tasks - from handheld field instruments to laboratory reference level bench top instruments.

JOFRA / JF Marine Instruments
A complete range of calibration equipment for temperature, pressure and signal, approved for marine use.

FP Temperature Sensors
A complete range of temperature sensors for industrial and marine use.

M&G Pressure Testers
Pneumatic floating-ball or hydraulic piston dead weight testers with accuracies to 0.015% of reading.

M&G Pumps
Pressure generators from small pneumatic "bicycle" style pumps to hydraulic pumps generating up to 1,000 bar (15,000 psi).
